

Shiv Bhagat

Glendale, CA | (213) 290-7572 | shivbhagat42@gmail.com

Objective

- Software Engineer with a Strong foundation in object-oriented programming with C++ and Python, complemented by front-end skills in React JS. Eager to apply my technical knowledge and commitment to innovation in impactful projects across diverse industries.

SKILLS

Programming Languages: C++, Python, Swift, JavaScript, Java

Technologies: HTML5, CSS3, React JS, Kubernetes

Tools: Git (GitHub), Visual Studio Code, RStudio, MySQL Workbench, Microsoft SQL Server, JIRA, Confluence, BitBucket, Rhapsody, Beyond Compare, Collaborator, VirtualBox, Docker

Operating Systems: Linux, Windows

Clearance: Active Government Top Secret Clearance

EXPERIENCE

Raytheon | Software Engineer I

March 2023 – July 2024

- Enhanced and maintained critical software systems for satellite testing, focusing on performance optimization and reliability through efficient C++ and Python coding practices.
- Automated C++ code generation using Python scripts, reducing generation time by 90% and integrating the generated code into Rhapsody UML models for seamless development.
- Participated in 72-hour lifecycle product testing in a secure lab environment.
- Worked cross-functionally with diverse teams on integration for new updates.
- Utilized Rhapsody, Beyond Compare, Collaborator, Git, and Visual Studio for various development and testing tasks, ensuring code quality and version control.
- Contributed to an IRAD project targeting future business opportunities by developing Python scripts with the Pandas library for data format conversion, creating unit tests, and participating in code reviews.
- Implemented Argo Workflows and Argo Events to trigger specific workflows based on defined event sources.
- Proficient in setting up and managing containerized applications using Docker and creating isolated development environments with VirtualBox.

Vara Now | Software Engineer Intern

June 2022 – August 2022

- Utilized React JS, HTML, CSS, and Firebase to create an innovative eCommerce marketplace and full-stack web application, contributing to the evolution of the core site architecture.

PROJECTS

Stats-Guru, Lead Developer

May 2024 – Present

- Developing a React JS, HTML, and CSS webpage using APIs to display NBA stats, live scores, standings, and game statistics.

Weather Dashboard, Lead Developer

September 2023

- Built a React JS weather dashboard utilizing the OpenWeather API for real-time conditions and 5-day forecasts.

Titan-Talks, Lead Developer, Scrum Master

October 2021 – December 2021

- Led a team of six using Agile methodologies to create a full-stack networking platform for CSUF students, utilizing React JS and MySQL.

BAPS North America, Lead Developer

May 2021

- Developed an iOS app in Swift to display BAPS temples on an interactive map using a JSON file for geographic data retrieval.

EDUCATION

California State University, Fullerton | Bachelor of Science, Computer Science

August 2019 - December 2022

- **GPA:** 3.71 (Cum Laude)
- **Accolades:** 3rd place, **Google Virtual Coding Competition** (2019); Dean's List: Fall 2019, Fall 2020, Fall 2021, Spring 2022.

KEY ACHIEVEMENTS

- Active Government Interim Top Secret Clearance.
- 3rd prize in Google Virtual Coding Competition (2019).
